Leintwardine Endowed CE Primary School Learning Journey Key

'Letting Our Light Shine'
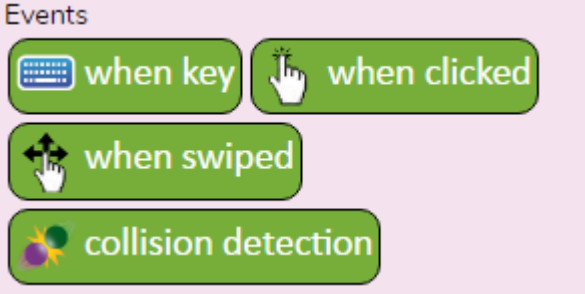

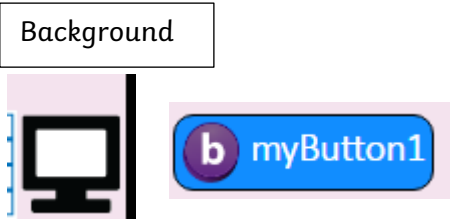

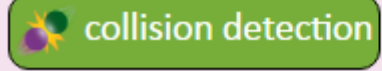

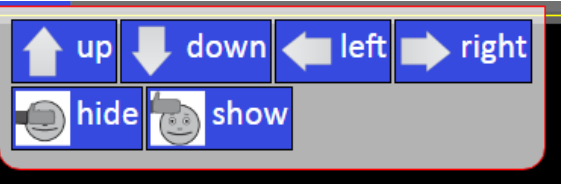

SUBJECT : Computing	YEAR : A	TERM : Summer 2	YEAR GROUPS : 1/2

Key Question: How can I make more interesting computer programs using timers and buttons?

Question	Vocabulary to Use	Information which will help me	Can I....?
Can I explain what an algorithm is?	predict algorithm object action event execute background plan design collision detection timer sequence modify properties button debug		explain what an algorithm is?

write my own programs which use a 'collision detection' event?

use a timer to schedule actions?

modify the properties of objects in my program?

write code that makes a button perform an action?

Debug simple programs? |
Can I use collision detection in my code?			
Can I use a **timer** to include a timed sequence in my program?			
Can I **modify** objects in my program using their **properties**?			
Can I write code that will make a **button** work?			
Can I **debug** programmes to make them work better?
